Wednesday, April 18th

 Wylio 7:00 AM
we're meeting at 3 today still right?

 William.Holm 9:12 AM
Should I have someone greeting at 3:00, I'll run over as soon as it's done, or we can push back a tiny bit, my calendar. We need to fix collection 2 for next today and look ahead for next.

 Wylio 10:52 AM
how about we meet at 3:30?

 🌤️

 Alexander.Wilson 10:59 AM
That is good for me

 William.Holm 1:26 PM
They were behind, just got out walking over from a corner

 Oliver.Larsson 1:29 PM
No worries, we're working on collection 2 connections

Thursday, April 19th

 William.Holm 9:25 AM
Accidentally pushed a bag to gk, need to go to class but just know I'm aware of it and will fix it soon my bad

Message #general

@ 😊

Trello

GitHub

- Great at keeping the project up to date
- Centralized and easy to use

Firebase

- NoSQL Database
- Cross Platform
- Works in Javascript (no need for an additional language)
- Authentication
- File hosting

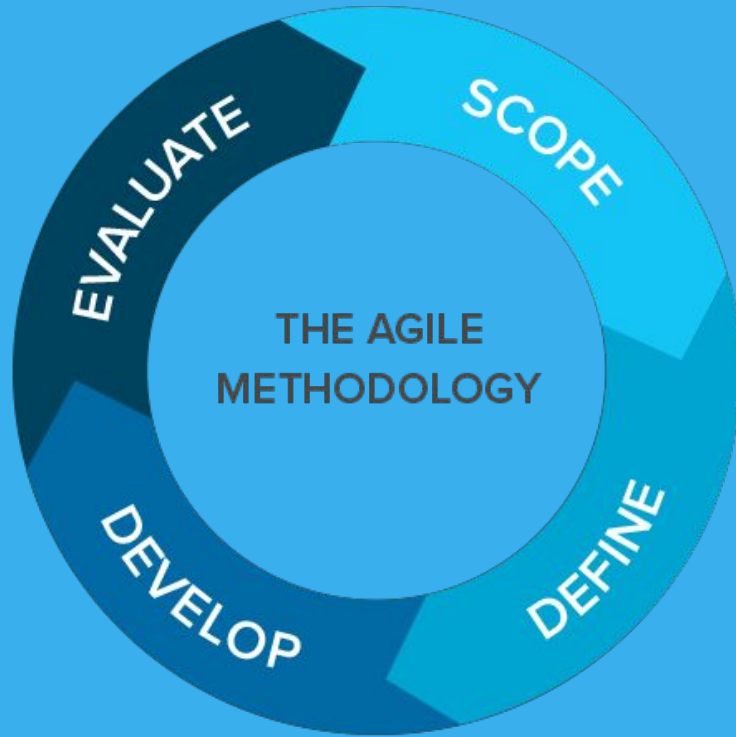

Selenium IDE

- Chrome plug-in extension
- Screen-record the expected behavior
- Add multiple tests into one test suite, and then run the whole suite

Project Management Methods Used

Challenges Encountered

- One team member stopped showing up, so we adapted the plan to not need him anymore.
- Safari and Chrome updates “bug”, browser error, our code was great
- Getting comfortable with GitHub
- Gathering up-to-date data, as it’s a somewhat seasonal app
